

The best way
to bright light.

OSRAM SUPERLUX® KRYPTON

SEE THE WORLD IN A NEW LIGHT

Up to 10 % more light

As far as brightness and quality of light are concerned, OSRAM SUPERLUX® KRYPTON lamps are miles ahead of ordinary light bulbs. Thanks to their krypton filling they provide up to 10% more light. Their high-quality coating ensures that the light is uniformly white and glare-free. This modern high-power light is therefore ideal for illuminating large rooms or areas used for reading or working.

For working and reading

Over your desk you need light that is more than just bright. The pleasant uniform light from OSRAM SUPERLUX® KRYPTON cuts down on annoying reflections on the work surface, the computer or any other reflective material. Bright light is important if you want to relax with a book without straining your eyes. Many fittings however restrict you to a relatively low wattage. This is where OSRAM SUPERLUX® KRYPTON can help, because it provides considerably more light than an ordinary light bulb from the same wattage.

Complete range

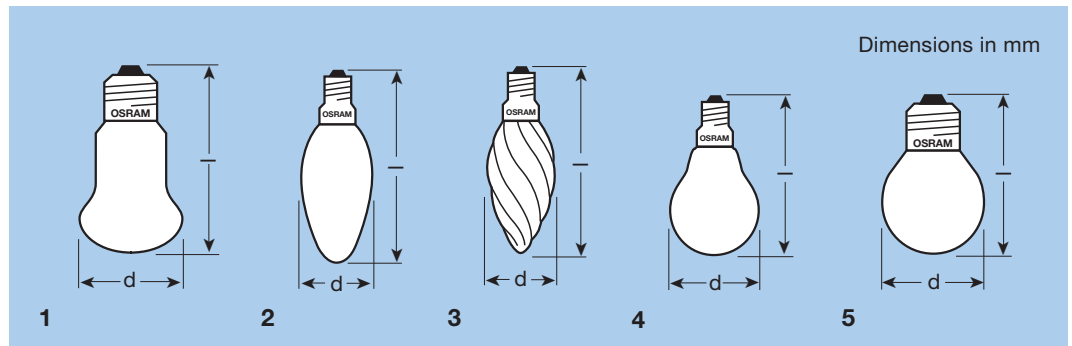

SUPERLUX® KRYPTON with their E14 and E27 screw bases put ordinary light bulbs in the shade. They are available in stylish mushroom and classic candle, twisted candle and round bulb shapes – in five wattages from 25 to 100 W. These elegant lamps will blend perfectly with any style of furnishing and decoration. They look so good you don't even have to hide them behind a shade.

Look out for the boxes or blister packs. Whichever you choose, the benefits of OSRAM SUPERLUX® KRYPTON are clear.

A little light relaxation. Up to 10% more uniform white glare-free light from OSRAM SUPERLUX KRYPTON®.
